Great, thanks Kevin.

The modification will have to be a *Major Modification*, meaning it will have to go through the Public Notification process.

It seems from what you described that Petroglyph will have to ensure the Mechanical Integrity of the well. If a cement repair solves the problem you should be able to place the packer within 100' of the top perf?

Thanks Bruce,

I've attached my contact info.

The well at issue is: Ute Tribal 05-08 Injector

EPA Permit #: UT2736-04324

Kevin
